

## Classroom Materials

**We provide all the necessary materials for your classes!**

Here you will find the Power Points for each of our course offerings as well as the required class materials needed to process each student so that they receive continuing education and a certificate of completion.

### **Power Point Presentations**

Make sure you download the correct one for the state you are teaching your class in as these have been approved by each state's Department of Insurance. In addition to the Power Point presentations, several states require state specific content which can be found below as well.

LTC Connection will send you a course outline for each student which will include a link for them to download the presentation if they choose to. If you prefer to have actual copies of the Power Points for your students, you can print them. We recommend printing them 3 or 4 slides per page.

### **Mandatory Initial LTC Training (8 hours)**
